

Joins Assignment

#1 Show products with category names

```
select p.product_name, c.category_name  
from products p join categories c on p.category_id = c.category_id;
```

#2 Show products with supplier names

```
select p.product_name, s.supplier_name  
from products p join suppliers s on p.supplier_id = s.supplier_id;
```

#3 Show sales with customer names

```
select s.sale_id, c.customer_name  
from sales s join customers c on s.customer_id = c.customer_id;
```

#4 Show sales with employee names

```
select s.sale_id, e.employee_name  
from sales s join employees e on s.employee_id = e.employee_id;
```

#5 Show customers with membership type

```
select c.customer_name, m.membership_type  
from customers c join memberships m on c.membership_id = m.membership_id;
```

#6 Show sale items with product names

```
select si.sale_id, p.product_name  
from sale_items si join products p on si.product_id = p.product_id;
```

#7 Show inventory with product names

```
select i.product_id, p.product_name  
from inventory i join products p on i.product_id = p.product_id;
```

#8 Show returns with product names

```
select r.return_id, p.product_name  
from returns r join products p on r.product_id = p.product_id;
```

#9 Show returns with customer names

```
select r.return_id, c.customer_name  
from returns r  
join sales s on r.sale_id = s.sale_id  
join customers c on s.customer_id = c.customer_id;
```

#10 Show sale items with sale date

```
select si.sale_id, s.sale_date  
from sale_items si join sales s on si.sale_id = s.sale_id;
```

#11 Show products with category and supplier

```
select p.product_name, c.category_name, s.supplier_name
from products p
join categories c on p.category_id = c.category_id
join suppliers s on p.supplier_id = s.supplier_id;
```

#12 Show sales with customer and employee

```
select s.sale_id, c.customer_name, e.employee_name
from sales s
join customers c on s.customer_id = c.customer_id
join employees e on s.employee_id = e.employee_id;
```

#13 Show inventory with supplier name

```
select p.product_name, s.supplier_name
from inventory i
join products p on i.product_id = p.product_id
join suppliers s on i.supplier_id = s.supplier_id;
```

#14 Show sale items with product price

```
select si.sale_id, p.product_name, p.price as product_price
from sale_items si join products p on si.product_id = p.product_id;
```

#15 Show customers with their total sales

```
select c.customer_name, s.total_amount as total_sales
from customers c join sales s on c.customer_id = s.customer_id;
```

#16 Show employees with sales handled

```
select e.employee_name, s.sale_id
from employees e join sales s on e.employee_id = s.employee_id;
```

#17 Show products with inventory stock

```
select p.product_name, i.quantity_in_stock as stock_quantity
from products p join inventory i on p.product_id = i.product_id;
```

#18 Show returns with refund amount and product

```
select p.product_name, r.refund_amount as refund_amount
from returns r join products p on r.product_id = p.product_id;
```

#19 Show sales with product names

```
select s.sale_id, p.product_name
from sales s
join sale_items si on s.sale_id = si.sale_id
join products p on si.product_id = p.product_id;
```

#20 Show customers with country and sales

```
select c.customer_name, c.country, s.sale_id
from customers c join sales s on c.customer_id = s.customer_id;
```

#21 Show products and categories

```
select p.product_name, c.category_name
from products p join categories c on p.category_id = c.category_id;
```

#22 Show suppliers and their products

```
select s.supplier_name, p.product_name
from suppliers s join products p on s.supplier_id = p.supplier_id;
```

#23 Show employees and roles with sales

```
select e.employee_name, e.role, s.sale_id
from employees e join sales s on e.employee_id = s.employee_id;
```

#24 Show customers and membership with sales

```
select c.customer_name, m.membership_type, s.sale_id
from customers c
join memberships m on c.membership_id = m.membership_id
join sales s on c.customer_id = s.customer_id;
```

#25 Show inventory with product and supplier

```
select p.product_name, s.supplier_name, i.quantity_in_stock as stock
from inventory i
join products p on i.product_id = p.product_id
join suppliers s on i.supplier_id = s.supplier_id;
```

#26 Show sale items with quantity and product

```
select p.product_name, si.quantity as quantity_sold
from sale_items si join products p on si.product_id = p.product_id;
```

#27 Show returns with sale date

```
select r.return_id, s.sale_date
from returns r join sales s on r.sale_id = s.sale_id;
```

#28 Show sales with membership type

```
select s.sale_id, m.membership_type
from sales s
join customers c on s.customer_id = c.customer_id
join memberships m on c.membership_id = m.membership_id;
```

#29 Show products and stock

```
select p.product_name, i.quantity_in_stock as stock
from products p join inventory i on p.product_id = i.product_id;
```

#30 Show suppliers with inventory

```
select s.supplier_name, i.quantity_in_stock as stock
from suppliers s join inventory i on s.supplier_id = i.supplier_id;
```

#31 Show customers with sales amount

```
select c.customer_name, s.total_amount as total_sales
from customers c join sales s on c.customer_id = s.customer_id;
```

#32 Show employees with salary and sales

```
select e.employee_name, e.salary, s.sale_id
from employees e join sales s on e.employee_id = s.employee_id;
```

#33 Show products with returns

```
select p.product_name, r.refund_amount as refund
from products p join returns r on p.product_id = r.product_id;
```

#34 Show sales with return details

```
select s.sale_id, r.refund_amount as refund
from sales s join returns r on s.sale_id = r.sale_id;
```

#35 Show categories with products

```
select c.category_name, p.product_name
from categories c join products p on c.category_id = p.category_id;
```

#36 Show suppliers with country and products

```
select s.supplier_name, s.country, p.product_name
from suppliers s join products p on s.supplier_id = p.supplier_id;
```

#37 Show sales and total items sold

```
select s.sale_id, si.quantity as quantity_sold
from sales s join sale_items si on s.sale_id = si.sale_id;
```

#38 Show inventory and restock date with product

```
select p.product_name, i.last_restock_date
from inventory i join products p on i.product_id = p.product_id;
```

#39 Show customers and join date with sales

```
select c.customer_name, c.join_date, s.sale_id
from customers c join sales s on c.customer_id = s.customer_id;
```

#40 Show products and price with sales

```
select p.product_name, p.price as product_price, s.sale_id
from products p
join sale_items si on p.product_id = si.product_id
join sales s on si.sale_id = s.sale_id;
```

#41 Show returns with customer name

```
select r.return_id, c.customer_name
from returns r
join sales s on r.sale_id = s.sale_id
join customers c on s.customer_id = c.customer_id;
```

#42 Show employees with role and sales date

```
select e.employee_name, e.role, s.sale_date
from employees e join sales s on e.employee_id = s.employee_id;
```

#43 Show products and supplier country

```
select p.product_name, s.country as supplier_country
from products p join suppliers s on p.supplier_id = s.supplier_id;
```

#44 Show inventory with supplier country

```
select p.product_name, s.country as supplier_country
from inventory i
join products p on i.product_id = p.product_id
join suppliers s on i.supplier_id = s.supplier_id;
```

#45 Show customers with membership and country

```
select c.customer_name, m.membership_type, c.country
from customers c join memberships m on c.membership_id = m.membership_id;
```

#46 Show sales with product quantity

```
select s.sale_id, si.quantity as quantity_sold
from sales s join sale_items si on s.sale_id = si.sale_id;
```

#47 Show products and return reason

```
select p.product_name, r.reason as return_reason
from products p join returns r on p.product_id = r.product_id;
```

#48 Show sales with employee and customer

```
select s.sale_id, e.employee_name, c.customer_name
from sales s
join employees e on s.employee_id = e.employee_id
join customers c on s.customer_id = c.customer_id;
```

#49 Show inventory with product and stock

```
select p.product_name, i.quantity_in_stock as stock
from products p join inventory i on p.product_id = i.product_id;
```

#50 Show full order details (customer, product, quantity)

```
select c.customer_name, p.product_name, si.quantity as quantity_sold
from customers c
join sales s on c.customer_id = s.customer_id
join sale_items si on s.sale_id = si.sale_id
join products p on si.product_id = p.product_id;
```
